

BOOTSTRAP BUTTONS AND FONTS AWESOME

Font awesome:

This website has awesome icons that are used in button like

`<i class="fab fa-apple"> </i> <!--Apple icon link --> insert this in button`

`<button type="button" class="btn btn-dark btn-lg" > <i class="fab fa-apple"> </i>
Download</button>`

`<button type="button" class="btn btn-outline-light btn-lg" > <i class="fab fa-
google-play"> </i> Download</button>`

Note: fab is code in website it is found as fa-brand which is not true so replace **fa-brands** by **fab**

This link uses **i** tag which means italic but not good they uses it for short code

Copy icon url from below site and paste it in header below stylesheet

`<script defer src="http://use.fontawesome.com/releases/v5.0.7/js/all.js"> </script> <!--
Add awesome fonts and icons like button icons-->`

<https://fontawesome.com/search?new=yes>

Buttons

Use Bootstrap's custom button styles for actions in forms, dialogs, and more with support for multiple sizes, states, and more.

Link:

<https://getbootstrap.com/docs/4.0/components/buttons/>

Examples

Bootstrap includes several predefined button styles, each serving its own semantic purpose, with a few extras thrown in for more control.

Primary Secondary Success Danger Warning Info Light Dark Link

Copy

```
<button type="button" class="btn btn-primary">Primary</button>
<button type="button" class="btn btn-secondary">Secondary</button>
<button type="button" class="btn btn-success">Success</button>
<button type="button" class="btn btn-danger">Danger</button>
<button type="button" class="btn btn-warning">Warning</button>
<button type="button" class="btn btn-info">Info</button>
<button type="button" class="btn btn-light">Light</button>
<button type="button" class="btn btn-dark">Dark</button>
```

```
<button type="button" class="btn btn-link">Link</button>
```

Sizes

Fancy larger or smaller buttons? Add `.btn-lg` or `.btn-sm` for additional sizes.

```
<button type="button" class="btn btn-primary btn-lg">Large button</button>
<button type="button" class="btn btn-secondary btn-lg">Large button</button>
```

```
<button type="button" class="btn btn-primary btn-sm">Small button</button>
<button type="button" class="btn btn-secondary btn-sm">Small button</button>
```

Create block level buttons—those that span the full width of a parent—by adding `.btn-block`.

Block level buttonBlock level button

```
<button type="button" class="btn btn-primary btn-lg btn-block">Block level
button</button>
<button type="button" class="btn btn-secondary btn-lg btn-block">Block level
button</button>
```

Outline buttons

In need of a button, but not the hefty background colors they bring? Replace the default modifier classes with the `.btn-outline-*` ones to remove all background images and colors on any button.

```
<button type="button" class="btn btn-outline-primary">Primary</button>
<button type="button" class="btn btn-outline-secondary">Secondary</button>
<button type="button" class="btn btn-outline-success">Success</button>
<button type="button" class="btn btn-outline-danger">Danger</button>
<button type="button" class="btn btn-outline-warning">Warning</button>
<button type="button" class="btn btn-outline-info">Info</button>
<button type="button" class="btn btn-outline-light">Light</button>
<button type="button" class="btn btn-outline-dark">Dark</button>
```

See more about buttons from above website.

Code:

Styles3.css:

```
/****** TAG SSELECTORS *****/
h1{
    font-family: "Montserrat-Black";
    font-size: 3rem;
    line-height: 1.5;
}
```

```
/****** CLASS SSELECTORS *****/
```

```
.container-fluid{  
  padding: 3% 15%;  
}
```

```
/****** ID SSELECTORS *****/
```

```
#title{  
  background-color: #ff4c68;  
}
```

Index3.html:

```
