

Bootstrap Cards

Examples:

<https://getbootstrap.com/docs/4.0/examples/pricing/>

Pricing

Quickly build an effective pricing table for your potential customers with this Bootstrap example. It's built with default Bootstrap components and utilities with little customization.

Cards

Bootstrap's cards provide a flexible and extensible content container with multiple variants and options.

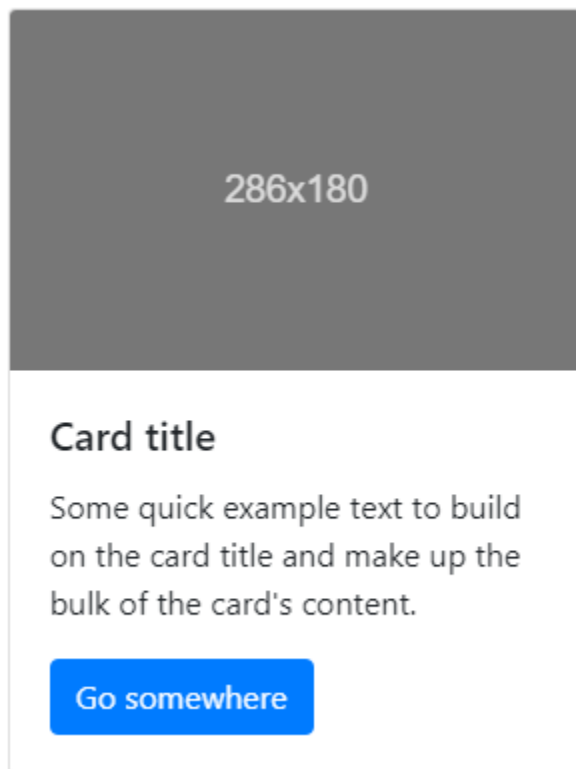

About

A **card** is a flexible and extensible content container. It includes options for headers and footers, a wide variety of content, contextual background colors, and powerful display options. If you're familiar with Bootstrap 3, cards replace our old panels, wells, and thumbnails. Similar functionality to those components is available as modifier classes for cards.

Example

Cards are built with as little markup and styles as possible, but still manage to deliver a ton of control and customization. Built with flexbox, they offer easy alignment and mix well with other Bootstrap components. They have no **margin** by default, so use [spacing utilities](#) as needed.

Below is an example of a basic card with mixed content and a fixed width. Cards have no fixed width to start, so they'll naturally fill the full width of its parent element. This is easily customized with our various [sizing options](#).

```
<div class="card" style="width: 18rem;">
  
  <div class="card-body">
    <h5 class="card-title">Card title</h5>
    <p class="card-text">Some quick example text to build on the card title and make
up the bulk of the card's content.</p>
    <a href="#" class="btn btn-primary">Go somewhere</a>
  </div>
</div>
```

Basic Syntax:

```
<div class="card">
  <div class="card-header">
    Card Header
  </div>

  <div class="card-body">
    Card Body
  </div>

  <div class="card-footer">
    Card Footer
  </div>
</div>
```

Code:

Index7.html:

```
<!DOCTYPE html>
<html lang="en" dir="ltr">

<head>
  <meta charset="utf-8">
  <title>TinDog</title>

  <!-- Google Fonts -->
  <link rel="stylesheet" href="http://fonts.googleapis.com/css?family=Montserrat|Ubuntu">
```
