

How to Incorporate jQuery into Websites?

jQuery:

<https://jquery.com>

Other CDNs

The following CDNs also host compressed and uncompressed [sourcemap files](#); check the site's documentation.

Note that there may be delays between a jQuery release and the time the blog post is made public. Beta and release

- [Google CDN](#)
- [Microsoft CDN](#)
- [CDNJS CDN](#)
- [jsDelivr CDN](#)

Google CDN is best choice.

<https://developers.google.com/speed/libraries#jquery>

Without this tag **jQuery** doesn't work

**<script src="https://ajax.googleapis.com/ajax/libs/jquery/3.6.0/jquery.min.js"></script>
<!--Paste it above below tag-->**

`<script src="index.js" charset="utf-8"></script>`

With jQuery our code becomes smaller.

Code:

Index.html:

```
<!DOCTYPE html>
<html lang="en" dir="ltr">
  <head>
    <meta charset="utf-8">
    <title>jQuery</title>
```

```
<link rel="stylesheet" href="styles.css">

</head>

<body>

  <h1>Hello.</h1>

  <button>Click Me</button>

  <button>Click Me</button>

  <button>Click Me</button>

  <button>Click Me</button>

  <button>Click Me</button>

  <script src="https://ajax.googleapis.com/ajax/libs/jquery/3.6.0/jquery.min.js"></script> <!--
Paste it above below tag-->

  <script src="index.js" charset="utf-8"></script>

</body>

</html>
```

Index.js:

```
jQuery('h1').css("color","red"); //$('h1').css("color","red");

/*$(document).ready(function(){

  $('h1').css("color","red"); //After loading the page, we access the h1 to change the color.

  //If I have to use this Method against above then we have to usejQuery Script tage in header
section else use this script in body

  //above <script src="index.js" charset="utf-8"></script> tag

});*/
```

Styles.css:

```
//Nothing do.
```
